2 Flights	R 20000.00	
Accommodation & per Diem (10)	R 12000.00	
<b>TOTAL</b>	<b>R 32000.00</b>	

## 3. Introduction and Background

In 1996 the Department of Environmental Affairs and Tourism (DEAT) undertook a review of existing environmental legislation in order to ensure that environmental legislation was aligned to the Constitution and new policies, as well as to consolidate and streamline laws governing the environment. The National Environmental Management Act (Act no 107 of 1998 – NEMA) was developed as overarching framework legislation for environmental management in SA. More recently, as part of the law reform process, DEAT undertook to develop national legislation governing pollution and waste management. DEAT has now completed the development of the draft National Environmental Management: Waste Management Bill. The Waste Management Bill is subsidiary and supporting legislation to NEMA that seeks to legally obligate the principles of the White Paper on Integrated Pollution and Waste Management for South Africa.

The development of the Waste Management Bill is undertaken with the assistance of an external legal drafter and financial assistance from the Danish International Development Assistance Agency (Danida). The Waste Management Bill was published in the Government Gazette on 12 January 07. An obligatory public comment period of 90 days is currently applicable. During this period of time DEAT is obligated to consult widely with relevant stakeholders regarding the contents of the Bill.

## 4. Objectives

The immediate objective is to provide DEAT with the necessary international expertise to enable them to draft and finalise the National Waste Management Bill within the SA waste management context. This however also require an international expert with ample experience within the SA waste management field.

The consultant must have technical expertise/experience in and a good understanding of:

- the matters to be dealt with in the Bill;
- the development of waste management legislation; and
- the IP and WM Policy for SA
- the National Waste Management Strategy for South Africa.

## 5. Main Output

The final output will be the completed Waste Management Bill which will be submitted to parliament by 13 June 2007. All written inputs from the international consultant will be compiled in a single file and serve as a final output from the consultant to the PSC.

## 6. Key Tasks

DEAT has identified the need to appoint an international technical expert to provide *ad hoc* technical assistance to the DEAT during the drafting process. The assistance to be given includes the following –

- commenting on the technical defensibility of the formulation of definitions;
- providing input, based on international experience, on the approach to be taken to the management of land contamination and other technical aspects of the Bill;

- commenting on drafts of the Bill in terms of technical implications of proposed wording and approaches;
- where requested, providing recommendations on possible refinements and/ or expansion of draft provisions in the Bill;
- advising DEAT on identified technical issues; and
- reviewing and commenting on technical submissions/comments received during the participation process.

## **7. Scope of work, management etc:**

The Consultant will refer to the Project Manager (consultant) and liaise closely with the Project Manager under the direct guidance of the Project Director (DEAT).

The process includes consultation with all relevant national departments as well as provincial environment departments and local authorities. Individual meetings will also be conducted with NGO's and Industry. Public meetings will also be conducted in each province with the assistance of the provincial environment departments. A Waste Conference is also planned for local authorities.

## **8. Management, Administration, Reporting**

**The Project Director** will be

Zanele Mvusi

Chief Director: Pollution and Waste Management.

+27 12 310 3388

**Resource persons** available in DEAT

- Obed Baloyi
- Dee Fisher
- Rantsadi Moatshe

## **9. Inputs**

**The Consultant** will provide

- Specialist input regarding international Waste Management approaches.
- Sound understanding of the Waste Management context in SA
- Drafting skills with regard to the Waste Bill in terms of proposed wording for specific clauses.

**DEAT** will provide

- Staff time as indicated
- All background information available and pertinent about the Waste Bill
- Venues and catering for workshops and meetings.
- Access to stakeholders important for input into the Waste Bill..
- All practical arrangements in connection with the meetings and workshops.

## **10. Monitoring, Reporting**

The outputs will serve, also as a formal reporting mechanism.

They will be submitted to the Drafting consultant. The Drafting consultant is responsible for incorporating all inputs into the Bill. Project Director must declare that the project has been completed before the last instalments are paid.

## **11. Financial Management**

This follows the procedures outlined in the contract of the assignment.

## **12. List of Annexures**

A. Draft Waste Management Bill

## **13. List of References**

None

## **Annexure A**

**Draft National Environmental Management: Waste Management Bill.**
